CAPABILITY STATEMENT

An Expert Team For You

WHO WE ARE:
 Aquatic Engineering Australia specialises in industrial water treatment throughout Australia and New Zealand. We are a specialist engineering business with a 25-year history of servicing customers on some of Australia's largest infrastructure and farming projects, as well as on large-scale industrial water treatment projects.

WHAT WE DO:
 Aquatic Engineering delivers cutting-edge solutions in the field of water treatment. Our team of engineers and technicians are specialist consulting engineers who design, manufacture, construct, commission, operate and maintain a range of water treatment plants.

THE AQUATIC ENGINEERING DIFFERENCE
 Aquatic Engineering are your partners in ensuring water treatment is managed to the highest standards on major projects across Australia and New Zealand. We take responsibility for water treatment, and the management of the environment around your process, designing systems that minimise the risk of pollution & contamination, ensuring our experience provides you peace of mind your project can run smoothly.

Aquatic Engineering Australia Pty Ltd
 1900 368 740 | aquatic-engineering.com.au

WHO WE ARE:
 Aquatic Engineering's solutions are tailored to a variety of needs, particularly in infrastructure and construction temporary works. We pride ourselves on our proven track record in engineering, showcasing our ability to adapt and deliver solutions for a wide range of project scopes.

WHAT WE DO:
 Aquatic Engineering delivers cutting-edge solutions in the field of water treatment. Our team of engineers and technicians are specialist consulting engineers who design, manufacture, construct, commission, operate and maintain a range of water treatment plants.

THE AQUATIC ENGINEERING DIFFERENCE
 We understand the risk profile that comes with managing water treatment on major infrastructure projects, and we understand and plan for these challenges before any starts are made. Our goal is that our staff, contractors and suppliers are all better for working with us, and that we assist in delivering a safer, more sustainable job site on every project we work on.
